

# BIVIDA

An open data platform for tenders

# Problem of Tender Corruption

- More than a trillion dollars are lost every year due to tender corruption
- The authorities are currently misusing their powers to give the contract to any candidate of their own choice
- The Tender advertisements aren't accessible by all
- Specifications for the bid are also fixed to suit a particular candidate

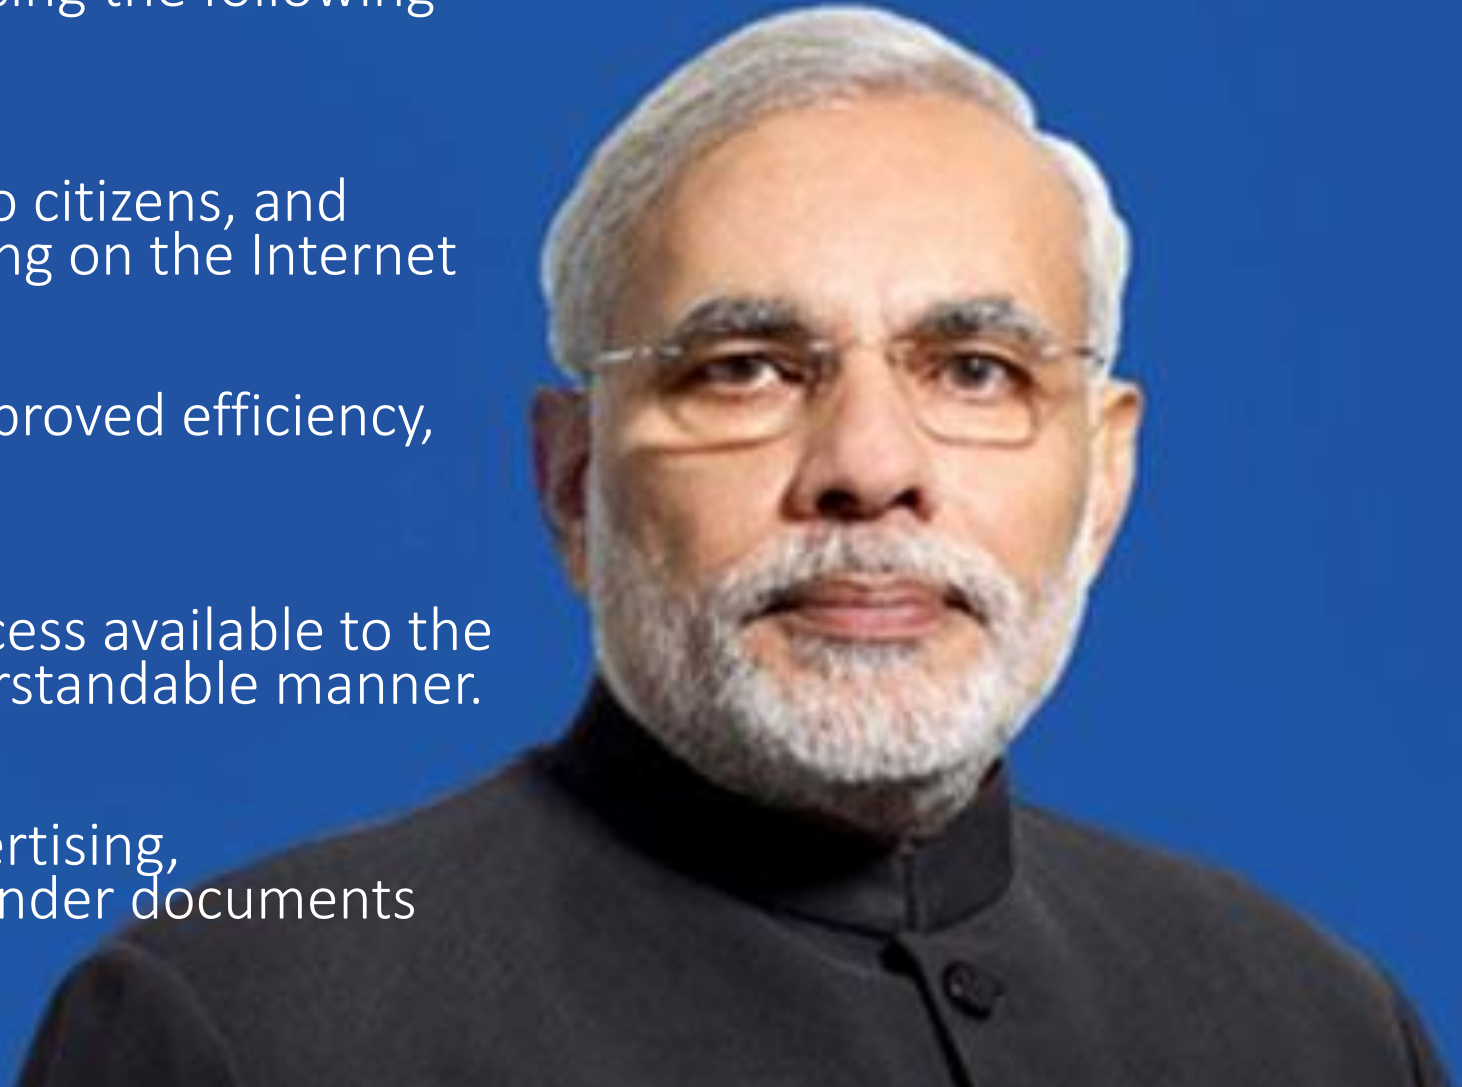

# BIVIDA

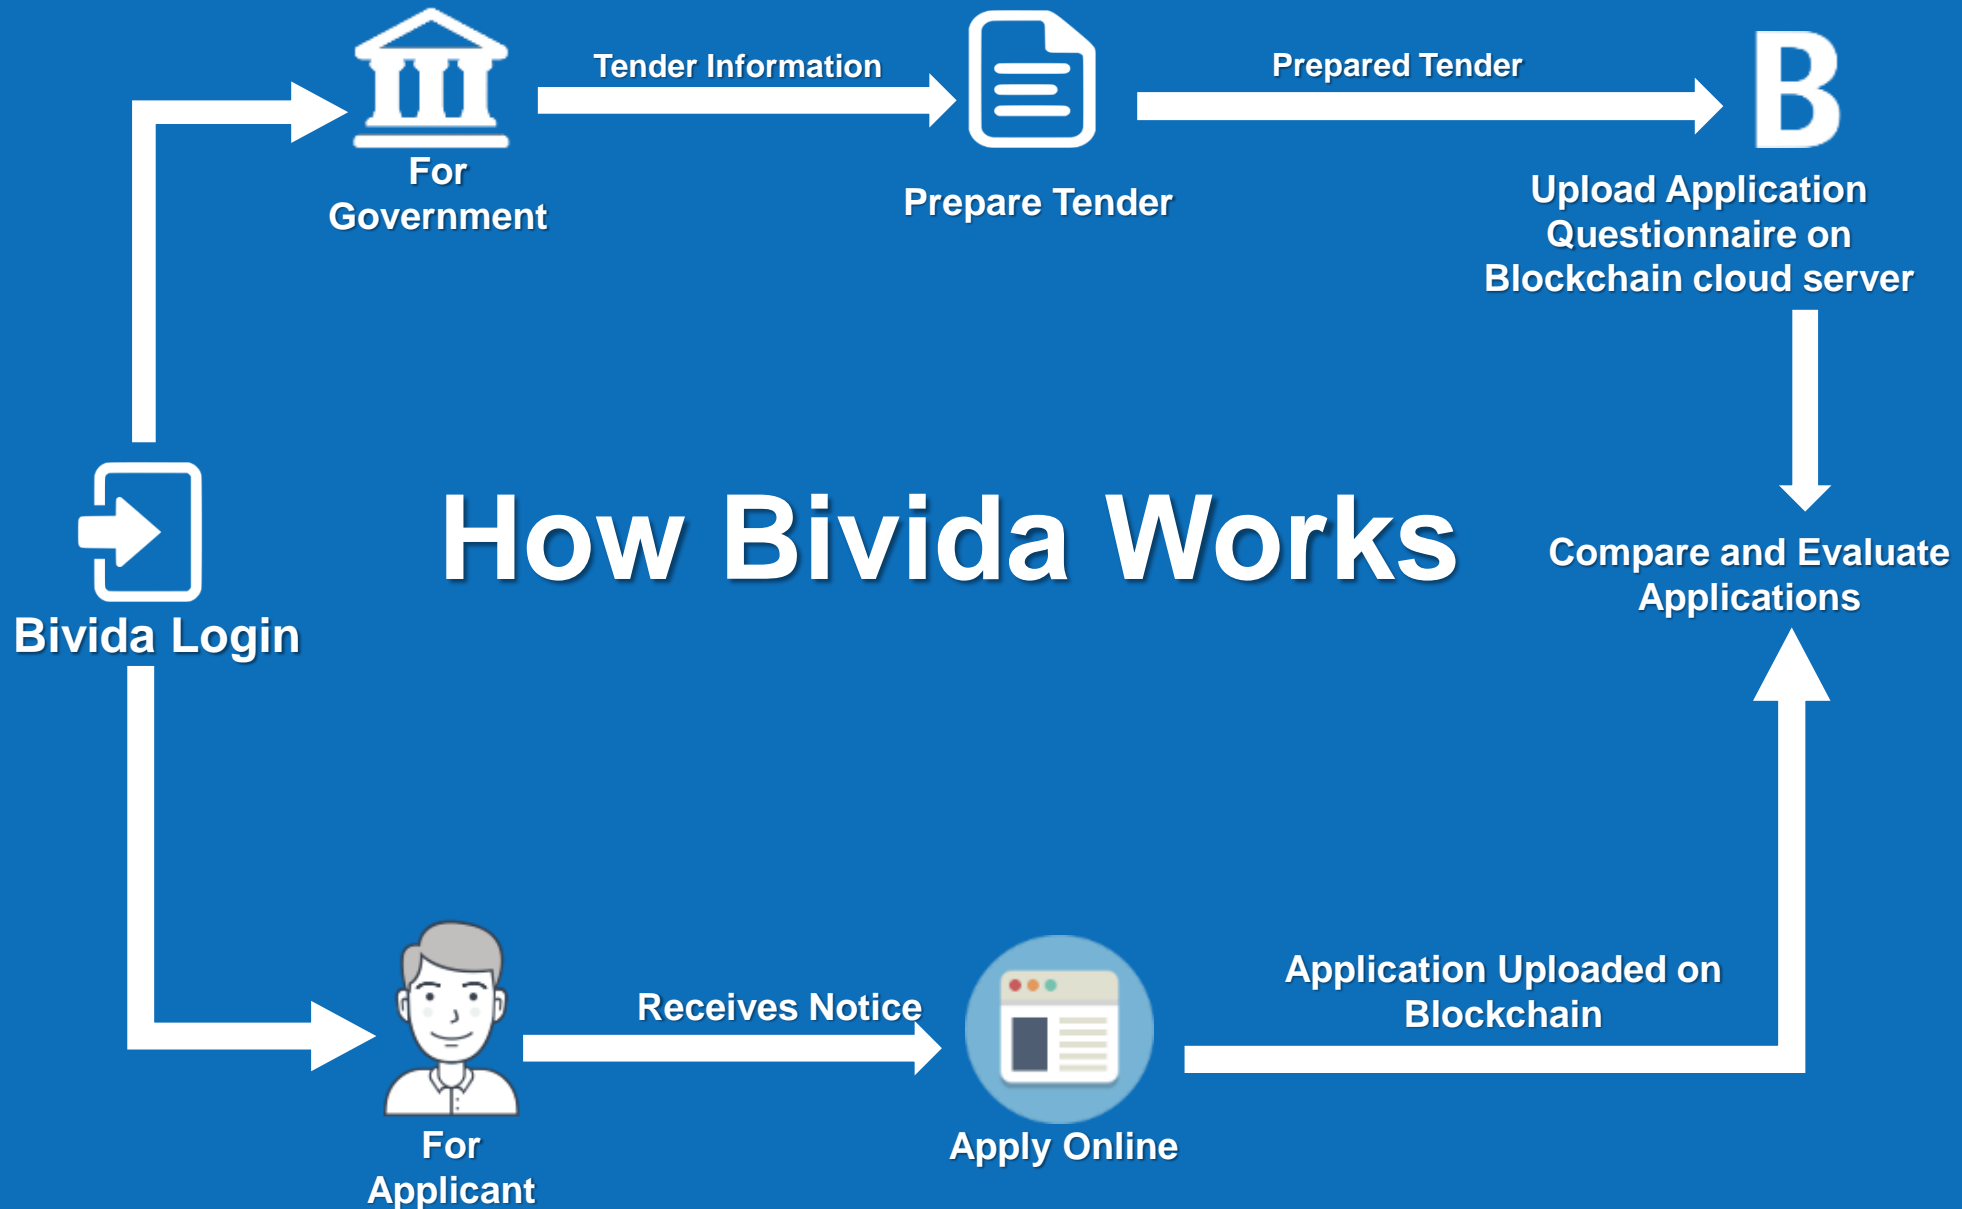

An open data platform for tenders  
that opens up public contracting through  
disclosure, data & engagement.

# Objectives

Bivida is an initiative towards our Prime Minister Narendra Modi's Vision of Digital India while addressing the following objectives:

- To ensure transparency, accountability to citizens, and incorporates all the benefits of transacting on the Internet
- To ensure anytime-anywhere access, improved efficiency, wider reach, and access to information
- To make the procurement selection process available to the public and in a more readable and understandable manner.
- Cut down tender processing costs - advertising, preparing, printing and disseminating tender documents

Application Received  
on Blockchain cloud  
server

Application Verification

Announcement of  
Winner of Bidding

# Workflow

# FEATURES

# TRANSPARENCY

All the application are visible publicly allowing anyone to verify the honesty of system.

# DECENTRALISED

Our system is decentralized and stores all data on its cloud server preventing manipulation.

# SECURE PLATFORM

Our system uses double hashing  
algorithm making the system  
completely  
immune to hacking

# COMPETITIVE ADVANTAGES

BIVIDA	Existing System
<ul style="list-style-type: none"><li>• Transparency</li><li>• Automatic</li><li>• Security</li><li>• Daily Tender updates</li><li>• Real Time Analysis</li><li>• Decentralized</li></ul>	<ul style="list-style-type: none"><li>• No-Transparency</li><li>• Human Efforts</li><li>• Prone to attacks</li><li>• No Tender updates</li><li>• No analysis at all</li><li>• Centralized</li></ul>
